CAREER OBJECTIVE

Frontend developer skilled in React and modern JavaScript, focused on building responsive and user-friendly web applications with clean and efficient code. Interested in solving real-world problems, learning new technologies, and growing within innovative development teams.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, Python, C, C++, Java, SQL

Frameworks & Libraries: React, MongoDB (MERN Stack)

Tools: Git & GitHub, Vercel, Netlify, Figma, VS Code

SOFT SKILLS

- Problem Solving & Debugging
- User-Centric Design Thinking & Responsive Web Design
- Project Management
- Team leads & Communication

PROJECTS

BloodLove (Blood Donate Platform)

[Client Code](#) | [Server Code](#) | [Live Link](#)

A responsive blood donation platform that helps users connect with donors and provide financial support through an intuitive and user-friendly interface.

Key Functionalities

- Authentication & role-based access
- Blood donation request system
- Donor search and funding support
- Responsive UI with real-time notifications

Technologies Used: MERN Stack, SweetAlert2, Vite, Netlify, Vercel, JavaScript.

PowMart (Pet Adoption & Pet Shop Platform)

[Client Code](#) | [Server Code](#) | [Live Link](#)

A responsive pet care platform that allows users to explore pet-related products, adopt pets, and access pet care information through a smooth and user-friendly interface.

Key Functionalities

- Pet adoption system with detailed pet listings
- Pet-related shopping interface (products and essentials)
- User-friendly category-based navigation for smooth browsing

Technologies Used: MERN Stack, SweetAlert2, Vite, Netlify, Vercel, JavaScript.
